As owner of the Crow's Nest Marina Restaurant since 1976 I have used Custom Dock & Davit for numerous marina projects over the years.

Most recently we rebuilt our fuel dock. Scott and crew did an excellent job on demolition of the old dock as well as the design and construction of the new dock with minimal interference with the rest of our operation. They coordinated permitting with our consultant as well. Other projects Custom Dock and Davit have done for us include our Transient Dock (200+ feet long in 12' water). That project was done in the 1990's and has endured the test of time. They have also rebuilt 2 sections of seawall for us (over 500'). We have occasionally used other marina contractors for repair work but have found CDD to be our 'go to' marine contractor for quality and value.
